### 1.1 Heading 2 in bold times new roman 11 use style "heading 1"

Don't use excessive numbers of headings two is often enough and three should be an exception. Try to keep headings concise and avoid them running onto multiple lines. Use title case on level 1 headings but only capitalise the first word at level 2 and 3.

Figure 1. This is how you label figures and tables. Use the style "Figure" to place the object centred above this line and for this title use "Figure title" style.

You don't need to add extra a space before or after a figure let the styles do the work again.

However, insert one blank paragraph before a table.

<b>PG Students 25-30</b>	<b>Height meters</b>	<b>Av. Weight kgs</b>
Male	0	0
Female	0	0

*Table 2. This is how you label tables. Centre tables without making columns wider than necessary.. The styles for the text in table cells are called "Table" and "Table header". Some cells may need special alignment. The style for this line is again "Figure title".*

See below for bullet points "Bullet":
